Mayor Agrees With Journal That Auditor's Figures Correct

Coleman, May 25th, 1926
Editor of The Coleman Journal,
Dear Sir:

With further reference to amounts paid for interest and exchange mentioned in the issue of May 20th I wish to state through The Journal that the figures given are made up as follows:

Interest to bank	\$ 36 70
Interest on notes, borrowed	
to build cement sidewalks	610 55
Exchange	30
	\$647 55

Yours truly,
W. J. Burns, Mayor

Re "The Canadian Red Cross Society."

St. Alban's Rectory, Coleman
May 26th, 1926.
To The Editor, Coleman Journal,
Dear Sir:

On Sunday, June 20th, it is proposed to make a special effort to bring before the people the work of the Canadian Red Cross Society.

The plan proposed is to invite the citizens and members of friendly societies in the town and neighborhood to parade to the Park, headed by the Town Band. There a service to be held with an address to be given by me on the subject of, "The Work of the Red Cross in Peace and War." A collection would be taken in aid of the Red Cross Society's funds.

An application has been sent in to the Mayor and Council for their permission to use the Park, and an invitation is herewith given to all societies to join in and help. Let us make this Coleman's contribution to the efforts of this venerable Society for the alleviation of the world's sufferings.

During my period overseas with the Canadian Army I saw the splendid assistance rendered to friends and foe alike by the Red Cross Society:

It is aim is the betterment of conditions everywhere, so that, irrespective of race or class, we may all have the opportunity of living a sane, clean, and healthy life.

Will those who are willing to assist in this effort please write to me at the Rectory as soon as possible.

Sincerely yours,
H. Laurence Noble,
Priest in charge

Elderly Lady Called Suddenly, Funeral on Sunday Afternoon

The community was saddened Wednesday morning to learn of the peculiar and sudden death of Mrs. Isabella Russell.

Mrs. Russell, although not feeling very well, had been doing a little gardening when seized by her fatal sickness and managed to reach her parlor.

Mrs. White, her next door neighbor, made the sad discovery.

Much sympathy is felt for her nephew, Mr. James Ewing. Both have resided in Coleman for over sixteen years.

Her many friends will miss her as a true and faithful friend.

The funeral service will be held on Sunday at 3 p.m. in St. Paul's Church.

Mr. and Mrs. A. Lonabury, Mrs. J. L. Lonabury, Mr. Wm. Lonabury, and Mr. T. Holstead motored to Waterton Lakes on Monday.

Opera House Crowded At C.N.P.F.A.A. Concert and Dance on Friday

The concert and dance held on Friday, May 21st, in aid of the Alberta Crow's Nest First Aid Association, was a huge success. At 7 p.m. the McGillivray Pipe Band played a few stirring tunes just before the doors were thrown open, and by the time the concert was ready to start the Opera House was packed to the doors.

Mr. D. Davidson was the chairman and gave a few interesting and instructive remarks on first aid to the concert with a selection. Then, Johnston gave a solo and Miss C. Fraser delighted the audience with her Scotch dashing. Mr. Fraser also gave a musical selection and Mr. S. White rendered a violin solo.

The chairman then called on Col. Hodgkiss to address the audience and to present Certificates to the members of the first aid classes. Dancing started at 10 p.m. with the Melody Boys and they kept the crowd until the wee sma' hours in the morning.

Upwards of about \$500.00 will be turned over to the secretary after all expenses have been paid.

Certificates Presented.
The successful members who took the examinations of the St. John Ambulance Association on February 7th, are as follows:

For Labels
J. Kerr, H. Parkinson and J. Glenendinning.

For Medallions
A. McCulloch, G. S. Greenhalgh, J. M. Rushton, G. Duffield and R. Morris.

For Vouchers
A. Leitch, R. Windler, H. Dunlop, J. Wilson, J. MacDonald, A. Muir, R. Davidson, G. Ordell, W. H. Garner and A. Kay.

First Year Members Certificate
N. MacKinnon, R. Jones, R. Davis, H. Tibbels, A. Corney, J. W. Eccleston, T. Eccleston, J. Beveridge, A. MacKinnon, R. Pryde, R. Neil, N. Whittaker, W. Wilson, R. Wilson, W. Kerr, J. N. Drepak, W. F. Watts and W. G. Jewitt.

Junior Certificates
Mack Hall and Fraser McLeod.
All those who did not get their certificates on Friday night may call at the house of Secretary J. M. Rushton and get them.

Law to be Strictly Enforced.

The Journal does not as a rule publish police court happenings, but occasionally we believe it is in the public interest to vary this policy. A case in point came up before Magistrate Gresham in Coleman on Tuesday evening, when John Mills and Ernest Malt were charged with racing their horses to the common danger through the streets of Coleman. These young offenders were found guilty, fined, received a warning and a severe reprimand from the Magistrate which they are not likely to forget in a hurry.

A little girl's life was snuffed out in Coleman about a year ago as the result of a similar episode, and it is the intention of the Town's law enforcement officers to see that stern justice is meted out to all reckless persons riding or driving to the common danger.

Miss G. McKay and Miss E. M. Tenney spent the holiday at Waterton.

SCOUT NEWS

Come On Out!

Angus Cameron has the honor of being the first Scout to pass the second class test. He is the leader of the Eagle Patrol of No. 1 Troop.

No. 1 Troop made a great job of cleaning up the park, twelve boys spending some ten hours on the work, for which they received fifteen dollars from the Town Council. This will enable all the boys engaged on the job to buy at least one article of their equipment.

Nos. 1 and 2 Troops had their usual meetings this week. All were well attended.

The two Troops combined for a Field Day on Empire Day, leaving the Scout hall at 7:30 a.m., and making their first halt for breakfast at 8 p.m. Everyone was very hungry, and three pounds of bacon and four dozen eggs barely sufficed. Someone added a most unwelcome flavor to the coffee by stirring it with a spruce bough. Dinner was eaten high up in the North mountains by a small creek. Fourteen pounds of sausages and various tins of pork and beans—to say nothing of the cakes that mother makes—and coffee (this time minus the spruce flavoring) were soon but a pleasant memory. The party then split—Patrol Leader Corney taking those who did not want to face the climb over the mountains, back by the trail. The rest divided into three parties, under the respective leadership of the Commissioner, Scout Master and Assistant Scout Master. The three parties reached "Scouts' Cave," where the whole company assembled for supper, and so back to town. Large bouquets of yellow lilies were brought in, and a very enjoyable day was had by all.

More work is needed for the boys to enable them to complete the purchase of their equipment.

Personal and Local.

Among those from Coleman attending the sports at Cowley were Mr. and Mrs. S. Moores, Mr. and Mrs. Geo. Morgan, Mr. and Mrs. J. H. Boulton, Mr. and Mrs. A. W. Morrison and Mr. and Mrs. C. V. MacKinnon.

The Coleman Journal has had a very busy time of it, making the municipal and school authorities toe the line in the interest of the ratepayers.—Blairmore Enterprise

St. Paul's Sunday School will meet on Sunday at 2 p.m. on account of the funeral of the late Mrs. Russell being held in the Church at 3 p.m.

The Rebekahs desire to thank all those who patronized their bazaar, tea and dance on Saturday, May 15th, when over two hundred dollars was raised.

P. M. Christophers, M. L. A., for Rocky Mountain constituency, was the unanimous choice of the 36 delegates in attendance at the Labor Party convention held in Blairmore on Saturday last week, to again carry the Labor standard in the forthcoming election.

The Coleman Boy Scouts made a very creditable job of cleaning up Plummerfield Park last week, and this useful spot now presents a very attractive appearance.

Under Pressure Mayor Divulges New Set of Figures, but Again Clashes With Auditor.

The Journal is indeed pleased to note, by a letter in another column, that Mayor Burns concedes the correctness of the figures we published last week, taken from the auditor's report, in regard to the amount paid out of the Town's treasury in interest on borrowed money. The Mayor's figures have, in the short space of one week, grown from \$38 70 to \$610 55, thus making the correct total (as The Journal stated) of \$647 55.

However, before leaving this one item in the auditor's report, The Journal is again forced to take issue with His Worship on his method of arriving at the correct total. If he, or anyone else interested in the matter, care to look up the auditor's report for 1925, under "Liabilities," sub-heading "Sundry Creditors," they will find these words and figures: "On notes payable (1926-1929) \$9,000, on interest accrued thereon \$253 24."

These are the cement sidewalk notes referred to by the Mayor, and if these words and figures say anything, they say that the interest on money borrowed (for the year 1926) to build cement sidewalks, amounted to \$253 24, NOT \$610 55 as stated by the Mayor. Once again The Journal is forced to believe that the auditor's figures are the correct ones, and that Mayor Burns will need to shrink his \$610 55 down to \$253 24 and explain where and how he got the extra \$357 31, in order to agree with the figures as given in the auditor's report.

However, in the last analysis, it is not material whether the Mayor again agrees with the auditor's report or not, as most of the ratepayers know that auditor's reports are authentic. The Mayor appears to be drawing a red herring across the trail, as the real serious municipal question facing us—as stated in a previous article in these columns—is the fact that last year we collected \$12,411 61 from all sources and expended \$15,603 85, leaving a deficit of \$3,192 24 on the year's operations. The Journal's contention is that it is not good business to close the Town's books in any year with a deficit anywhere approaching this figure, and yet make no special effort to collect the \$3,193 78—sufficient to retire the sidewalk notes in full—due the Town from delinquent taxpayers.

Second Week of Big Sale

Monday of this week The Journal job department turned out another full sheet sale bill for the Quimette Close Out Sale, telling about the big special bargains being offered, on Wednesday and following days of this week, with grand specials for Saturday to wind the week up with a bang. If you did not get a poster go to the store on Saturday and explore.

Mr. and Mrs. James Ford motored to Lethbridge on Sunday and took in the soccer game on the holiday. According to Mr. Ford there was very little to choose between the picked team from the Crow and Southern Alberta's stars. The one goal margin in favor of the latter was giving them good value.

Many from Coleman who visited Waterton on the holiday speak very highly of the splendid new dance pavilion recently completed at the park. Some even go so far as to claim it is the finest of its kind in the West, so attractive in fact, that even men of the cloth are occasionally numbered among those present.

Town Band Holds Enjoyable Social Evening

A social evening was given by the members of the Coleman Town Band on Monday, May 24th, which was played and the prizes were won by:—Gents first Mr. A. Fraser, consolation Mr. T. Eccleston. Ladies first Mrs. W. Vincent, consolation Miss M. Gillespie.

Dancing commenced at 9:30 p.m. and a delightful lunch was served, followed by a musical selection by Mr. A. Fraser and Mr. Campbell. Miss Fraser then obliged the company with the "Sailors Hornpipe" dance, which was encored enthusiastically, and replied to with the Irish Jig. The eighteen reel was sure enjoyed by the Scotch folk, the accompaniment being Mr. A. Fraser and Mr. Campbell. Dave Sande's dance with the children "Ring-a-Ring-a-Rose" was sure enjoyed by the kiddies. The Choir under the leadership of Mr. D. Sande was one of the most important items of the evening and his talent as a Choir leader was amply proven. A spot dance was then given and the prizes were won by Mr. M. Brennan and Miss O. Richards. Splendid music was supplied by Messrs Mason and Bond.

Much credit is due to the Band members for the splendid program which was given. Dancing continued until the early hours of the morning, and everybody present reported having had a most enjoyable evening.

Personal and Local

Messrs. A. E. Brocklehurst, Earl Price, and J. Douvle went to Fernie Sunday, returning home Monday evening.

Mr. H. Clark spent the holiday at Fernie.

Miss Jean Stewart, of the local teaching staff, spent the week-end in Calgary.

Dr. and Mrs. D. W. Davis and children motored to Coleman from Kimberley last Saturday registering at the Grand Union, and spent the week-end renewing acquaintances. They left on their return journey late Monday afternoon.

Mr. and Mrs. A. M. Morrison, Mr. and Mrs. C. W. MacKinnon were visitors to Waterton Lakes on Monday.

The exterior of the Empire hotel is being greatly improved by a coat of stucco. Contractor J. S. D'Appolonia is in charge of the work.

Mrs. F. J. Donkin and children arrived from Winnipeg on Sunday, and Mr. and Mrs. Donkin have taken up residence on 3rd street in the house formerly occupied by Mr. and Mrs. W. L. Rippin.

Mr. and Mrs. Joseph Emmerson, Rev. and Mrs. D. K. Allan spent the holiday at Waterton Lakes National Park.

Mr. and Mrs. J. A. McLeod and family motored to Waterton Lakes on the holiday.

This Wonderful Age

Recently within the short space of one week two exploration parties crossed the North Pole without mishap and in comparative comfort, thus realizing what has been the ambition of daring and adventurous men for centuries. Their achievements were rendered possible by the use of the air routes instead of by ship through the icebound waters of the Arctic seas.

Daily communication is maintained between London and Paris by airships carrying passengers and freight, the time schedules being as regular as those of the best managed railways, and a few weeks ago the trip from London to Paris was made in ninety minutes by the use of an airplane carrying a score of passengers and several tons of express freight.

Throughout large sections of the United States mail is now transported by airplanes with the result that important letters are delivered thousands of miles away within a few hours of mailing whereas formerly days were necessary for their delivery. Regular mail services by air are now established and maintained right across the continent, and the number of such routes is increasing every year.

With the short span of one generation the horse and buggy has been superseded by the automobile with its small, compact internal combustion gasoline engine, a means of conveyance on our highways, and a day's journey of a few years ago is now only a matter of hours, or even minutes, and hundreds of thousands of people who never dreamed of keeping a horse and buggy now have their horrid carriages.

When the electric telegraph, the telephone, and finally the trans-Atlantic cable came into operation most people felt that the best word in rapid communication had been written, and now almost overnight has come the marvelous development of radio whereby the most remote and inaccessible places in the world can be kept in constant touch with centres of population and activity. The successful flights over the North Pole were known to the world within a few hours. No longer are ships at sea isolated between ports, and one in distress can call others to its assistance just as a sick person in a city can summon his doctor by telephone.

Photographs of scenes in connection with the great British strike were printed in New York papers the following day, transmitted across the Atlantic by radio, and even the Western prairie these pictures were reproduced within three or four days whereupon your ranch pictures would not have been available here for two weeks or more.

In another way time and distance and cost of operation are being reduced in the West through the introduction of oil-electric cars on our steam railroads, thereby also eliminating the smoke and other discomforts of travel.

For centuries the enormous powers in our great rivers, cataraacts and falls have been pure waste being unutilized. Now this cheapest of all known sources of power is being harnessed the world over and placed at man's disposal, with the result that not in cities alone but in the rural home the benefits of electric light, power and heat are available, while all industry has entered upon a new era of expansion.

Within one century or so the old living the yellow candle has given way before the kerosene lamp, and the lamp has been replaced first by the carbon electric light and best by the cheaper, more efficient tungsten lamp. The first batteries, the best in use, the current news of the day is carried by radio into the humblest and most isolated homes, and it is only a matter of time before to foresee that at no distant date people everywhere will be able to witness as well as hear their far distant occurrences.

"Julius Verne's flights of fancy in 'Twenty Thousand Leagues Under the Sea' and 'Around the World in Eighty Days' are today accepted facts and almost every day a new era of expansion.

Presidents there still are who insist that the world is becoming worse, not better, that mankind is headed for destruction, that with increase of population he world will not be capable of producing enough food to sustain life, that with our prodigious use of fuel these resources will become exhausted and the race will freeze and die, and so forth. Such croakiers there always have been, and probably always will be, but their dire predictions of ways fail to be realized. Man has ever been able to solve the problems confronting him. Necessity has ever been the mother of invention, and at 10 time in the history of the race has inventive genius been more fertile in practical ideas, nor has science been so consistently employed to achieve important and lasting results.

Predicts Bumper Crop

May Surprise Banner Years in West
Says Eastern Man

Returning from a tour of the western provinces, Theobald Mathew, vice-president and general manager of the Massey-Harris Company, prophesied that 1925 would see a western crop which would rival, if not surpass, the bumper years of the past. Not since 1915, he declared, had he seen the wheat crops so well advanced, the farmers in such a flourishing condition and the general tone of the west so optimistic.

Official Fairy Story Teller

The English town of Irford has an official fairy story teller, who gathers the children about her and relates to them the tales of dwarfs and giants and to have entertained the young in all parts of the world for hundreds of years. Since Mrs. Mary, Bradford, the official story teller, began her work, 12,936 children have sat at her feet and listened to the stories.

When a man is dead broke he usually has very little life in him.

On A Gallon Of Gas

Car Is Said To Travel Twice As Far on a Concrete Road Than a Dirt Road on Same Gas

Consumption
The country-wide improvement in public highways in the United States and Eastern Canada, has worked a remarkable increase in automotive gasoline mileage.

It is said that a gallon of gas carries an automobile 50 per cent. farther on a concrete road than on a gravel road and twice as far as on a dirt road.

Thus the character of the highway has a direct and vital bearing on gasoline mileage.

Other factors that bear directly on gasoline mileage are efficient carburetion, camshaft timing, valve stem, gear ratio, ratio of power to weight, cooling system and tire equipment.

Correct design and co-ordination of these features increase the life of a gallon of gas.

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip To Tint or Boil to Dye

Each 15-cent package contains directions for coloring any woman can tint soft, delicate shades of pink, blue, green, yellow, red, brown, black, etc. in lingerie, silk, ribbons, shirts, waists, dresses, coats, stockings, sweaters, drapery, etc. Buy Diamond Dyes—no other kind—and try your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Survives Four Generations
A proxy at Edwardsville, Ill., has blossomed for 126 years. In 1790, George Barnsbach, an early settler, sent to Germany for the plant. It has survived four generations.

THOUSANDS OF THANKFUL MOTHERS

Strongly Recommend Baby Own Tablets to Their Friends

Once a mother has used Baby's Own Tablets for her little ones she would use nothing else. They give such results that the mother has nothing but words of praise for them. Among the thousands of mothers throughout Canada who praise the Tablets in Mrs. David A. Anderson, New Glasgow, N.S., who writes: "I would not be without them. I would give every other mother of young children to keep a box of the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which purifies the bowels and sweetens the stomach; drive out constipation and indigestion, break up colds and relieve fever and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Coal Waste Is Valuable

Can Be Used For Perfumes and Other By-products Says Scientists

Fuel conservation was discussed as a vital problem by practical scientists attending the eighteenth annual meeting of the International Railway Fuel Association at Chicago.

Science is coming to the aid of the railroad in this matter, the members of the association declared. "The waste in coal is not to be taken care of by chemical processes and the day is not far off when that waste will be turned into oils, dyes, perfumes and other valuable by-products," it was predicted.

Great Demand For Romanoff Table Linen

Thousands of Pieces Sold to Americans For Souvenirs
Royal napkins and tablecloths belonging to the Romanoff family are in enormous demand in the United States. Entirely new and bearing the coat of arms of Emperor Nicholas, tens of thousands of pieces of this table linen have been sold by the state to American buyers, who sent them home to relatives and friends as gifts. The napkins are of the finest Holland linen, are large enough to serve as tea tablecloths and cost 15 cents each.

Gives A Novel Treat

Dr. Edward E. Sloan, of South Middleboro, Mass., has been giving her family and friends a novel treat by serving lemonade and lemon pie made from lemons picked from trees she raised indoors. The tree now has about forty blossoms on it.

Minard's Liniment King of Pain

Says He Felt Drunk

Most Of The Time
Brooklyn. My head was dizzy. I couldn't think clearly. One day I dropped a coin and when I stooped to get it I got so dizzy I almost fell. I later found out that the cause of this condition was constipation. It was overcome by a short course of Carter's Little Liver Pills. My appetite has been doubled, and my dizziness has entirely left me.

Carter's Little Liver Pills move the bowels and relieve the system of its poisonous matter.

Druggists, 25 & 75c per package.

Has Gained Nothing

Germany Sees No Advantage In Recent Treaty With Russia

Germany, with all the apparent advantages, has gained nothing from her formal and special intimacy with Soviet Russia. And at this very moment the reports of German correspondents—generally favorable to the Soviet Government—on economic conditions in Russia are gloomier than ever. What they say of the failure of Soviet export plans, the growing opposition of the peasantry, the enforced restriction of Soviet industry, the desperate expedients of a distracted administration, and the inflexible registration of these facts in the steady decline of a currency stabilized with enormous difficulty, is abundantly confirmed by the dismal and embittered confessions of the Soviet press. The economic failure of the Soviet regime is now obvious in Russia and adds a new burden to the opposition of the Soviet oligarchy—London Times.

New Color Process

Inventor Claims Wonderful Possibilities From His Electrical Machine

A multi-colored electrical impression by Justice C. Zuhl, an engineer in the Puget Sound navy yard at Bremerton, Wash., to print any color on any surface, is among the inventions to be shown at the national inventors' exposition in Portland, Ore.

A man wearing a white dress may slip into a department store and, without removing the dress, have it changed to red for the afternoon and go back and have it made blue for the evening, the inventor declares.

The machine may be taken into a home and in a few minutes change the design of a rug or the colors of the wallpaper. Plain glass windows may be given fancy designs. Advertising signs and bill boards which strike painters to make might be printed with this machine in a few minutes, Zuhl asserts.

\$12,400,000 In Oil

Notice of Incorporation of no fewer than 19 oil companies in Calgary, Edmonton and Saskatoon is given in a recent issue of the Canadian Gazette.

The companies have an aggregate capitalization of \$12,400,000.

Are Your Nerves On Edge?

Japan to Have Interesting Exhibit at Philadelphia Fair
Tokio.—A miniature tower of pearls, both cultured and natural, will form part of Japan's exhibit at the Philadelphia Sesquiennial exposition. It will have a value of approximately \$350,000.

The exhibit is constructed in the shape of a pagoda, is slightly over three feet high and contains 201,230 cultured and 2,270 natural pearls of varying sizes. The display has received the approval of the Empress.

Tighten Border Defences

Rum Running and Smuggling to be Curbed at Border
Border defences against rum running and smuggling of contraband goods has been so tightened during the last year or so that the spring rush is not the success it formerly was. Promiscuous crossing of the border with cargoes of liquor has been forced to give way to carefully organized rum-running, largely owing to the fact that customs and immigration forces are co-operating in an effort to dam the flow of Canadian liquor into the United States.

As a vermicide an excellent preparation in Mother Gave's Worm Expeller has been found to be of countless children.

Good blood isn't everything. The child of a King must be taught which spoon to use.

Use Minard's Liniment in the stomach

Question Of International Law

If Empire Is At War Every Part Is Automatically Involved

The Sydney Evening News editorially states: "Mr. Woodsworth, a Labor member for Winnipeg, who raised the question that Canada should not become involved in empire wars, with out deciding the questions at issue for herself, overlooked the fact that by international law when the empire is at war every part of it becomes automatically involved. It is a partnership and any partner can involve the others. The extent to which any Dominion participates is not a matter of compulsion, but of popular will. If Great Britain embarked upon a manifestly unjust war each response of the dominions would be feebler than if the issue were one which had a higher moral warrant. It is true that both Britain and the dominions might be honestly mistaken, but the great point is that in the ultimate analysis, the basis of the empire is the assent of its people founded on their belief in its justice and its necessity as a custodian of world peace."

Japs Like Gold Teeth

Those Who Can Afford Do Cultivate Perpetual Smile

Whenever a Japanese gets any money ahead he buys himself a gold tooth and cultivates a perpetual smile. This illuminating and fascinating fashion, too, is upon something in the works by the Kobe Chronicle, which declares that a prefectural investigation revealed that local dentists last year had sold gold valued at \$2,226 yen for decorating the teeth of customers. A movement is under way to start a fashion in plain white teeth.

For Aches, Pains, The Safe Home Remedy NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats sore from coughing, when you are suffering from a vigorous rubbing with good old NERVILINE. If it's Croup, Colds, Diarrhoea, Nerve Pain, a wonderful remedy, it brings ease and comfort so quickly. For young and old, to overcome the most common ailments in the home, nothing compares with "Nerviline"—35 cents at all dealers.

Fun At The Exhibition

Six Platform Acts Booked For West
are Canada Fairs

Six big platform acts for the Western Canada fairs circuit have now been booked and will make their first appearance on the loop in Brandon on June 28.

The Boganny Lunatic Bakers, brought over from London by the Shuberts, will provide a comedy act. The Petkeys present an exhibition of (trampolines and comedy) dancing stunts, while the Little Trio give an acrobatic turn. Dennis Curtis brings along a dog and pony show, while the Australian Waiters are reputed to be the best leading whip cracking and boomerang artists. Sluggo, the rubber cup, will provide all the clowning stunts on the grandstand.

No matter how deep-rooted the corn may be, it must yield to Holroyd's Corn Remover if used as directed.

A Tower Of Pearls

Japan to Have Interesting Exhibit at Philadelphia Fair
Tokio.—A miniature tower of pearls, both cultured and natural, will form part of Japan's exhibit at the Philadelphia Sesquiennial exposition. It will have a value of approximately \$350,000.

The exhibit is constructed in the shape of a pagoda, is slightly over three feet high and contains 201,230 cultured and 2,270 natural pearls of varying sizes. The display has received the approval of the Empress.

Russia Has Large Army

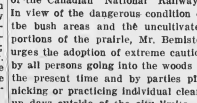

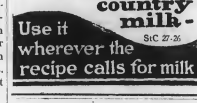

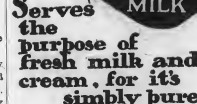

Under Circumstances Other Continental Powers Cannot Consider

Russia has one of the largest armies on the continent. She is not a member of the league; she is not on friendly terms with most of her neighbors; she is suspected of fanning Europe's troubled waters on all possible occasions. Under the circumstances no continental power will consider disarmament while Russia, fully armed, maintains moral and material isolation.—Brooklyn Eagle.

Self-Poisoning Increasingly Common

Modern Living Habits Promote Self-Poisoning—Thousands are Victims

The average man or woman does not enjoy consistent good health. Loss of appetite, headache, biliousness and a lack of enthusiasm for either work or play are constant complaints. Scientists have ascertained that such a condition is usually caused by self-poisoning resulting from constipation. Due to modern living habits, the natural secretion which promotes regular elimination by softening the bowels, is often deficient—especially among middle-aged people. The poison from waste matter remaining in the systems of people thus affected is the insidious enemy of good health. Such people need Naji, because Naji softens the waste matter and regular bowels, and helps to regulate the intestinal muscles. It helps Nature to do its work. Ask your druggist for Naji to-day—and remember, look for the name "Naji" in red on both bottle label and package.

GOVERNMENT HAS A MAJORITY ON HOUSE VISION

Ottawa.—A division on a motion for appointment of a special committee of the house to consider railway estimates gave the government a majority of 15. The division stood as follows: For, 107; against, 92.

Majority, 15.

As in the budget divisions, Progressives, Independent and Labor members voted with the government. Two Conservative members contributed to the government majority, R. S. White (Mount Royal) and W. F. McLean (South York), Premier King did not vote. Right Hon. Arthur Meighen was absent from the division through illness. Premier King announced subsequently that, although he had been not been paired for today's division, he had refrained from voting as continued illness was obviously the cause of Mr. Meighen's absence.

The division came a motion by Hon. C. A. Dunning, minister of railways, for appointment of a special committee of the house to consider Canadian National Railway estimates. Under the motion, the committee is to consist of six Liberals, six Conservatives, three Progressives and one Labor. It was against this composition that Conservative opposition was mainly directed. Conservatives wanted a membership of seven Conservatives and one Progressive.

The motion was carried in its original form. W. A. Boyd, chief Conservative whip, suggested that the unanimous consent of the house be obtained to increase the membership of the committee by one; and that the additional member be appointed from Nova Scotia Conservatives. Premier King thought the resolution should pass in its original form. Whips might hold a conference afterwards and make any recommendations to the house, subsequently which they thought desirable.

Farmer Bodies Are Planning Amalgamation

S.G.G.A. and F.U. Will Decide at Convention in July

Saskatoon.—The joint convention of Saskatchewan Grain Growers' Association and Farmers' Union of Canada, at which the proposed amalgamation of the two organizations into the United Farmers of Western Canada Saskatchewan section, will be finally decided, for or against, has been commenced, and is held in Saskatoon, July 15. Mrs. Violet McNaughton, of Harris, secretary of the two organizations, announced at the end of a meeting of the committee here. The recommendation will go to the executives of the two organizations to be ratified. It is anticipated that about two thousand delegates will be present. The S.G.G.A. and F.U. of C. will convene separately first, and then will convene as one body.

To Establish Vancouver Plant

Incorporation Papers Are Issued to British Engineering Firm

Victoria.—Canadian Vickers Limited, the Canadian branch of the great British engineering and construction firm, is looking to developments in Western Canada now and to keep abreast of them is incorporating to do business with headquarters at Vancouver. Incorporation papers issued here state that the company, whose Canadian headquarters are in Montreal, is capitalized at \$5,000,000.

Prison Sentence For Spies

Three Englishmen Found Guilty By French Criminal Court

Paris.—Three Englishmen who were arrested here last December on charges of espionage, have been given prison sentences in Criminal Court. The court found they had endeavored to obtain secret documents concerning French maritime and aviation stations. At the time of their arrest it was charged that the three men were former British officers in the intelligence service of Great Britain. The British foreign office, however, denied all knowledge of the men's activity.

Forms New Ministry

Brussels.—Henri Janne, former foreign minister, has consigned to form a ministry to take the place of the Poullet cabinet which resigned last week.

Riots in India

Calcutta.—Five persons were killed and 21 seriously injured in disturbances which broke out between religious factions in Kharagpur, Bengal.

W. N. O. 1670

India's Only Woman Ruler Abdicates Throne

British Government Granted Request For Only Son to Succeed Her

London.—India's only woman ruler, Her Highness the Begum of Bhopal, has abdicated her throne in favor of her son, Nawab Zada Hamidulla. For a long time she had contended for the Islamic right to name her successor, who under ordinary procedure should have been the son of her deceased eldest son, Nawab Nasrulla Khan. The British Government finally acceded to her desires.

The abdication of the Begum brings to an end a period of 80 years of female rule in the little state of Central India of 6,902 square miles, with a population of about 700,000. She had ruled Bhopal for a quarter of a century with vigor and statesmanship.

Although now 68 years old, she still is mentally and physically vigorous. Nevertheless she long had wished to see her only son established as her successor before her faculties failed her.

Nawab Zada Hamidulla is now 21 years old. He had been educated and trained in statesmanship under his mother's direction. He was out of the staff of the Prince of Wales during the Prince's visit to India and also served in the war. He has a splendid reputation.

Having succeeded in her efforts, it is said she retires happily from the cares of the government.

Influence Will Not Help

Home Bank Depositors Will Be All Treated Alike

Ottawa.—Influence or no influence has no bearing on this matter, said Premier W. L. M. King in the House of Commons regarding the payment of Home Bank depositors. Peter McCallum, Conservative, Mukoka, had quoted a newspaper article which said that some depositors found it difficult to obtain the promised 35 per cent. payment because they lacked influence.

The prime minister said influence had nothing to do with it. He understood that a group of depositors had held a meeting, discussed their position and decided to come to Ottawa in the form of a deputation to make their representations to the government. When they come, said Mr. King, they would be received. He said any delegation and their claims would be given every consideration.

Accepts Aid From Soviets

Money Refused By Trades' Union Goes to British Miners

Moscow.—The Soviet news agency announces that A. J. Cook, secretary of the British Miners' Federation, "has accepted with deepest thanks" the money given by the Soviet miners to aid the strikers in the British Isles. The news agency adds that Mr. Cook has requested that the money be transferred immediately to England "as the miners' need is very great."

Previous dispatches from Russia announced that the sum collected for the British miners in Soviet Russia amounted to about \$1,000,000. The money was offered to the British Trades Union Congress during the recent general strike, but was declined.

Storms Have Ruined French Fruit Crop

Unless Weather Improves Soon Cereals Are Also Threatened

Paris.—Fruit crops all over France have been ruined by snow, rain, hail and gales, while cereals are threatened, if the improvement promised by the weather forecaster does not materialize quickly.

Many valleys which suffered badly at the beginning of the year from floods again are menaced by rising waters, notably the Upper Marne, the Rhone and the Durance.

Train Farmer Settlers

London.—The steamer Minnedosa, which sailed for Canada, May 21, carried 30 boys who are going to Vimy Ridge training farm at Guelph, Ontario, to take a course in agriculture. The boys are going out under the Ontario Government scheme for the training of young settlers.

Maighan to Speak in Winnipeg

Brussels.—Right Hon. Arthur Meighen will be the guest of honor at the convention of the Manitoba Conservative Association, to be held in Winnipeg, June 8. Mr. Meighen will be one of the chief speakers.

Neighboring in Balkans

Paris.—General Paraskevopoulos, the new Greek premier, wishes to practice a policy of neighborliness in the Balkans, particularly with Yugoslavia, he told the French press.

Awaiting Boat To South

Members of Amundsen Expedition Housed in Cabin at Nome

Nome.—Four Arctic explorers settled down to routine life in a cabin here and continued to exchange reminiscences of their experience in flying over the top of the world.

Awaiting the arrival of a steamer the party, headed by Roald Amundsen, discoverer of the South Pole and the first to reach the North Pole, are content to rest. There were indications of a long stay, as the next boat out of Nome will be on June 15.

The dirigible Norge, the huge gas bag in which the explorers made their way through clouds, fog banks and Arctic temperatures from Spitzbergen to Teller, 75 miles from here, is being carefully picked for shipment out of Alaska by steamer when the ice locked harbor thaws out.

Captain Amundsen, Lincoln Hall of New York, and Captain Oscar Wisting and Lieut. Oskar Omahai, all members of the expedition, are occupying a cabin which they have christened the Explorers' Club. Here they plan to hold forth until a steamer is sighted.

Report Says Boyed Banned From States

State Department Requested His Recall to Germany During War

Berlin.—Captain Karl Boyed is said to have been refused a visa to enter the United States.

The passport bureau of the state department is declared to have regarded the time too short since his war activities when naval attaché of the German embassy at Washington to permit him to re-enter the country.

He was recalled by Germany at the request of the state department in 1915 because of his military and naval activities.

MAJORITY OF 13 FOR GOVERNMENT ON BUDGET VOTE

Ottawa.—After over a month of debate ending in an outright sitting, the house defeated the Conservative amendment to the budget by a majority of 13. The vote stood: Against 121, for 108.

An unusual feature of the division was that neither Premier King nor Right Hon. Arthur Meighen, Opposition leader, cast a vote.

Mr. Meighen was absent through illness. Mr. King was paired with Mr. Meighen.

There were no party switches. Liberals present voted solidly against the amendment. Conservatives went solidly for it. Progressives, Independents and Labor voted with the government.

Announcement of the result was greeted with loud Liberal cheers.

The house then again divided on the main budget motion.

Red Lake Railway Bill Defeated

Ottawa.—After a few minutes discussion the railway committee of the house rejected a bill for the construction of a railway line from Quibell, Ont., on the Canadian National about 100 miles north to the new gold mining district of Red Lake.

The committee's decision came on the preamble of the bill which was defeated by 21 to 13 thus rejecting the bill itself.

Gather Strawberry Crop

Seattle.—The Columbia Indians, who enter Washington State to harvest a \$1,500,000 Puget Sound strawberry crop, under a United States department of labor ruling, the Indians are required to register on entry and to leave within a reasonable time. The berries are ripening two or three weeks ahead this year.

Chips of the Old Block for Canada

Here are a few examples of the class of settler that is being brought over to Canada by the Canadian Pacific Railway.

Of the best British stock they took the part and a finer crowd of children and young people could not be found anywhere in the world. Each of them at this age and they are complete Canadians in a few years. Take the first Nicol family from Wichester, Scotland, who are settling at Edmonton, father and mother, two girls and four boys. Then there is the Shivers family from Birmingham, England, one of the boys and girls, bound for settlement. Finally there are Annie, Jeffrey and Mary, the children of F. Heald, of Fleetwood, Lancashire, also bound for Saskatoon. These are the type of immigrants that Canada is hungry for and is always glad to have. Above are shown the Nicol family. Over—Annie, Jeffrey and Mary.

REDUCTION OF ARMAMENTS IS DIFFICULT TASK

Geneva.—Nations will fear to disarm, because other nations actually weaker but potentially stronger, can in the long run conquer them—that is the supreme stumbling block to disarmament which looked at the opening session of the preparatory commission of the League of Nations, which was held in France mentioned it, Belgium, overwhelmed in the Great War, emphasized it anxiously, and Premier Mussolini's spokesman even declared: "If you do not take account of every kind of potential military strength in a country, then you show a desire to weaken a weak state and strengthen a strong one."

Vincenzo Celesia frankly declared that Britain's responsibility to her overseas possessions or mandated territories were the measure of possible reductions in her land forces and also probably in the number of British cruisers, but he thought that reductions could be made by agreement in the size of the cruisers and in the number of submarines.

Yet he asserted that the British people were "passionately desirous" of securing a reduction of armaments—"one of the chief causes of that high taxation which leads to unemployment."

Ban On Fortune Telling

Practice Will Be Prohibited in Vancouver

Vancouver.—While palmistry, phrenology and astrology are recognized as sciences under the Canadian criminal code, and persons practicing them are liable to receive civil licenses, fortune telling by tea-cup "readings" and cards are illegal, and will be banned in Vancouver hereafter, states Chas. Jones, city licensing inspector.

The practice of giving free readings of life future in Vancouver tea shops and beauty parlors has lately achieved great popularity, said Mr. Jones, and persons permitting it, to continue will be liable to cancellation of their business licenses and to police action under the criminal code.

Red Lake Railway Bill Defeated

Ottawa.—After a few minutes discussion the railway committee of the house rejected a bill for the construction of a railway line from Quibell, Ont., on the Canadian National about 100 miles north to the new gold mining district of Red Lake. The committee's decision came on the preamble of the bill which was defeated by 21 to 13 thus rejecting the bill itself.

Gather Strawberry Crop

Seattle.—The Columbia Indians, who enter Washington State to harvest a \$1,500,000 Puget Sound strawberry crop, under a United States department of labor ruling, the Indians are required to register on entry and to leave within a reasonable time. The berries are ripening two or three weeks ahead this year.

Will Explore Ungava Territory

Expedition Will Make the Trip in Three Aeroplanes

Quebec.—What is considered the most important expedition that has ever been sent out by the Provincial Government will leave Seven Islands in June next by aeroplane, for a long exploration trip in the vast territory of Ungava. The expedition will be headed by the Hon. J. H. Belanger, well known surveyor, who has several similar undertakings to his credit already, and will comprise about fifty men and be divided into three parties, with Mr. Belanger, Paul Savard and Arlen Chiffolleau as the respective leaders.

The whole exploration will be accomplished in three aeroplanes. The principal aims of the expedition are the preparation of a detailed report on McLean's Fall, considered the largest falls in Canada, 800 feet in height and three-quarters of a mile wide. More than 1,000 miles will be covered by the explorers during the four months they expect to be absent.

Oppose Suggestion For Canadian Standard

Management of Historical Association Would Keep Union Jack

Ottawa.—The management committee of the Canadian Historical Association, in its report presented at the annual meeting of the association here, expressed "its strong disapproval of any attempt to substitute another flag for the Union Jack as the Canadian standard."

A motion to this effect was passed last fall by the British Columbia Historical Association and copies of it were sent to all other provincial historical associations.

The report of the management committee states that "so far as replies have been received, the consensus of opinion appears to be in sympathy with that of the British Columbia Historical Association."

The report adds that it does not think it advisable to take any further action.

Gold Deposits Found Near Arctic Circle

One Bodies Were Discovered By Electrical Prospecting Methods

Saskatoon.—New gold deposits, classed as fourth in the entire world, have been discovered by electrical prospecting methods developed by Hans Lundberg and Karl Sundberg, mining engineers, at Bolden in the province of Vestmanna, not far south of the Arctic Circle.

Nineties have been located by electrical drift, across all covered by glacial drift, swamps or lakes.

One deposit was traced through the ice at the bottom of a lake 30 feet down.

Besides gold these ore bodies have been found to contain copper, silver, arsenic, sulphur and pyrites.

DECLARES STRIKE WAS DISASTROUS TO LABOR CAUSE

London.—Severe criticism of the general strike was voiced by Frank Hodges, secretary of the International Miners' Federation since 1925. In a press interview he characterized the strike as "a disaster motivated by blind passion to try out a machine which, though perfect on paper, took no account of simple human nature and economic forces."

He declared that the gigantic effort of the Trades Union Congress was a mere toy in the presence of the economic facts and social forces with which it was confronted.

Mr. Hodges said that the miners' present fight is "a fruitless and tragic sacrifice against inexorable economic facts," and that prudent leadership would dictate that the miners should not be permitted to go further and face worse.

Ramsay MacDonald, the leader of the parliamentary Labor group, speaking in behalf of the Labor candidate at the Hammersmith by-election, attacked the government for breaking off the negotiations which would have averted the general strike.

As to whether the general strike had been successful, Mr. MacDonald said: "If the position of the government after the strike the same as before the strike? Of course it was not. If Premier Baldwin at the end of the week before the strike had done what we asked him, gain and cease to do, the strike would have been a success. And he did it within two days after the calling off of the strike."

Call U. S. "Shylock of World"

Toronto.—"Istard" will be among various European nations meant that there was danger of another war among the Europeans. Hon. James W. Gerard, former United States ambassador to Germany, appeared in an address here. He also referred to the United States as "the Shylock of the world" in connection with its attitude on war debts.

French German Air Accord

Le Tourneur, France.—The first commercial airplane coming from Germany since the recent aviation accord reached between France and Germany has arrived here. The plane carried seven passengers.

Drought in Philippines

Manila.—The Philippines are being parched with heat and drought. Manila has been almost without rain for five months, and there is an acute shortage of water.

CROP PROSPECTS ARE REPORTED TO BE EXCELLENT

Ottawa.—Crop prospects in general are exceedingly good, although the season is a little late in some parts of Eastern Canada, says Hon. W. L. Stothard, minister of agriculture, in a statement on the crop situation.

Advices from the Maritime Provinces indicate that the season is from ten days to three weeks late, which means that very little seedling has yet been done, continues the statement.

In Quebec also the season is late and but little seedling has yet been done in the western and southern parts of the province, and none in the eastern and northern sections.

In Eastern Ontario seedling is well under way, but the season is quite two weeks late, while in Western Ontario seedling was finished only a week or so, much later than usual.

Wheat seedling has been completed in Manitoba and good progress is being made with coarse grain. Grain appears to be germinating well and promises an excellent stand.

Excellent prospects are reported from Saskatchewan where wheat seedling is practically completed and good progress is being made with the seedling of other crops. The season is ahead of last year, and early wheat is already above the ground promising an excellent stand.

Following an open winter in Alberta, spring work is well advanced and is much earlier than usual. At Grande Prairie, some 35 miles northwest of Edmonton, cereals are already in full bloom. Wheat is practically all seeded, as far north as even Vermilion, and the recent general rains have ensured good germination.

Seedling is completed in British Columbia and in this province and on the prairies mild weather has ensured fall wheat and pastures coming through without winter killing.

Cost Of Publishing Government Paper

Britain Spent \$2,000,000 Printing Gazette During General Strike

London.—Publishing The British Gazette, the government paper, during the general strike cost approximately \$2,000,000.

Winston Churchill, chancellor of the exchequer, who was editor of the temporary morning paper, says he regarded it as a surprisingly small sum of money. "Had the strike lasted another three days," he said, "The Gazette would have assumed a paying basis, but this was much better off and the strike."

Mr. Churchill admitted a good many free copies of The Gazette were issued.

Practically the only people in the newspaper world now unwilling to resume their old places are the mailers. As a consequence the large distributing houses for newspapers have declared that in future such houses will not be entirely union houses as they were previous to the general strike.

Germany Closes Loan Market

U. S. Has Been Superseded By Britain and Holland

Berlin.—The United States, which has long been about the only money lending market available to Germany, has been superseded by Great Britain and Holland, says a report by the Hiltens Gossel, one of the large Berlin banks. The report shows that Germany, since January 1, raised approximately 2,500,000,000 marks (\$20,950,000), of which 1,500,000,000 marks were raised abroad and 670,000,000 at home.

Call U. S. "Shylock of World"

Toronto.—"Istard" will be among various European nations meant that there was danger of another war among the Europeans. Hon. James W. Gerard, former United States ambassador to Germany, appeared in an address here. He also referred to the United States as "the Shylock of the world" in connection with its attitude on war debts.

French German Air Accord

Le Tourneur, France.—The first commercial airplane coming from Germany since the recent aviation accord reached between France and Germany has arrived here. The plane carried seven passengers.

Drought in Philippines

Manila.—The Philippines are being parched with heat and drought. Manila has been almost without rain for five months, and there is an acute shortage of water.

Conditions Best Since Before War
Conditions generally in all parts of Western Canada are the best they have been since before the war, according to S. J. Hungerford, vice-president of the Canadian National Railways, who has just returned from an extensive tour of inspection of the system lines in the west. He states that there is a splendid spirit of optimism prevailing, which is fully justified by the prospects

for a good crop and increased business, also a disposition to embark on new business ventures. Speaking of British Columbia, Mr. Hungerford reports a heavy volume of lumber going to both Canadian and United States ports on the Atlantic seaboard as well as to European ports via the Panama canal. Also, the indications are that the Pacific coast province will have the largest fruit crop of its history this year.

"In Every Way—Better"

PEOPLE who look for and appreciate comfort in a motor car are invited to try the added comfort in the Better McLaughlin-Buick.

The Better McLaughlin-Buick is big enough and balanced correctly to carry itself well on any road, but not too big to be ungainly or hard to handle. Seating space is generous. Leg room is ample enough for tall people to relax. Cushions are deep and yielding and tilted to a restful angle.

Rear springs are McLaughlin-Buick cantilevers, which smooth out road inequalities far better than any other type. Low-pressure tires are standard equipment on all models. Your first long ride in the Better McLaughlin-Buick will show you how restful miles can be.

The new low GMAC financing rates are available to purchasers of McLaughlin-Buick on time.

Tourist Season in Full Swing

The auto tourist season in Alberta is now in full swing, fully two weeks earlier than last year. Hundreds of tourists are already to be seen passing through Coleman each week over the All Red Highway in the South, while Calgary reports that in that city the big auto camp has recorded the visit of 140 tourists since the beginning of May. The Banff-Windermere highway is now open for traffic, and the Alberta end of the highway, from Calgary to Banff, which has been open all winter, is in excellent shape and is witnessing a very heavy tourist traffic. The prospects at present are for the heaviest tourist season in the province's history.

An Envious Position

"In estimated national wealth in millions of dollars, Canada stands seventh on the list, higher than Australia, Brazil, Argentina and in fact higher than any of the newer countries into which surplus population can freely flow", Dr. D. A. MacGibbon, professor of political economy, University of Alberta, stated recently. In wealth per capita Canada is only surpassed by the United States and Great Britain, contributing "Canada is second, the only five nations showing a surplus on current account, and is also among those countries having a food surplus. She ranks fifth among the nations as an exporter and seventh as an importer."

Use Planes in Mining Development

Plans for the development of platinum claims on the northern border of Alberta involve the use of aeroplanes. One of these planes has already arrived in Edmonton and is being put into shape by those interested in the development of these claims.

New Wells for Turner Valley

Several new wells are being spudded in at Turner Valley Oil Fields, and will be under way during the next week or two. In the Wainwright field east of Edmonton, recent developments include the striking of further pockets of gas, in wells being drilled there.

Cowley sports drew one of the largest crowds that ever attended this annual event on Monday. All those present from Coleman on the West to Pincher Creek in the East, thoroughly enjoyed the splendid list of attractions, despite the chilly breeze blowing from the West.

Tourists In Increasing Numbers Now Coming To Western Canada Are Offered Many Attractions

The mental picture of the Canadian west is a vision splendid. Were an onlooker to view the scene from above Winnipeg, the eastern gateway of the prairie, and have his range of vision sufficiently extended, he would see spread out to the westward a vast, gently rolling, fertile plain, gradually rising to the foothills of the Rocky Mountains, over nine hundred miles away. On the right, the northern edge of the prairie merges into a transition zone of mixed prairie and woodland, commonly called the park belt, and north of this, and stretching away indefinitely, is a belt of forest land, interpenetrated by lakes and waterways. In the extreme southwestern corner of the prairie appears a stretch of ranching country. And in the north, snows and glaciers of the Rocky Mountains the majestic Saskatchewan draws the whole plain and pours its twin waters into the inland sea of Lake Winnipeg to the north. It flows through the Nelson River into Hudson Bay. Through the prairie belt extend three transcontinental railway lines with innumerable branch lines crisscrossing in every direction, and stretching out into the north country.

The most striking feature of the landscape viewed from above is the vast checkerboard effect produced by the system of surveys which divide the whole country into blocks one mile square, by roadways running due east and west and north and south. In this province the Dominion of Canada has the greatest continuous area in the world held on a systematically based subdivision surveys.

Dealing with the territory by and large; the prairie is the great wheat producer; the prairie and foothills contain about 15 per cent of the world's coal reserves; the southern corner is the ranching country; the forest belt north of the park lands is the chief seat of the lumbering industry, and the home of the fur-bearing; the Canadian range across the north-east is now the scene of metalliferous mining development; and from the great rivers and lakes come the whitefish and sturgeon which supply the tables of half the continent.

The prairie, which in fifty years has advanced from a Great Lone Land to be the empire's granary, wherein the production of all kinds of grain has attained to the total of almost one thousand million bushels per year, are naturally the centre of interest. In this area which has a population of over two millions are located the chief capitals of the three provinces and other centres of distribution and manufacturing, the rapid rise of which has been the romance of the past twenty-five years.

The attention of the onlooker is drawn to the all-embracing road system, not by a sight of the roads themselves, for they are, for the most part, so hidden by the tall verdure that the whole country appears to be an unbroken whorl of wheat, but because of the constant passing to and fro across the landscape of heavily laden farm wagons and of a countless number of motor vehicles of every description. Automobiles are indeed everywhere, for it is not hard to say that the west appears to have been created for the automobile and the automobile invented for the west. The advantages of this checkerboard system of surveys which has done so much to assist in the rapid development of the country, are at once appreciated by the visitor, for a glance at a map or a short run along any highway shows him that in whatever direction he desires to travel he can do so as readily as he can take his way about the streets of his own home town. He sees that if he proceeds, say west, he will within a mile come to a road running north and south, and that travelling on this road in either direction for a mile he will reach another crossroad parallel to the first. He need not ask questions. He simply starts his car, and the new highway turns and reaches his destination. It is almost impossible to lose oneself.

The tourist has before him one of the most fascinating lands imaginable. Whether he desires to travel by train or steamboat, automobile or canoe, whether his tastes incline to palatial hotels, bungalow camps, or tents, he will find ample satisfaction for every wish. Hunting, fishing and riding, mixing camps are all easily combined; should he be a connoisseur he can drop his craft into the Saskatchewan or the Assiniboine and paddle over out-landscapes even to Hudson Bay. If he seeks a new thrill he can travel in commodious motor steamers down the Mackenzie River system to the land of the midnight sun, and the Arctic Ocean.

Where every section has its tourist

Dentist Says City Smoke Injures Teeth

Smokes From Soft Coal Interfere With Ultra Violet Rays From Sun

Progress made by his adventures along the nebulous trails of pure science has been formally accepted for the year by the National Academy of Sciences.

The annual assembly of this little group of curious and thoughtful men ended recently and they have gone back to their remote fields of research after exchanging specimens of the foundation stones of future practical knowledge they have discovered in the last year.

Among these as disclosed at the concluding session, are bits of fact about sound, the ultra violet rays and the adrenal glands. Dr. Weston A. Price, dental research worker, of Cleveland, reported he had learned that smoke from the burning of soft coal by interfering with the ultra violet rays from the sun, was the reason that city children's teeth were more vulnerable to decay than those of their country cousins.

A man can avoid a scrape by letting his whiskers grow.

Beekeepers In Saskatchewan

Output of Honey Last Season Was Seventy-two Thousand Pounds

The average production per hive for the past two years at the University of Saskatchewan has been about 120 pounds of extracted honey, with an estimated value of 20 cents per pound. Bees have been kept successfully as far north as Hudson on the Big River branch of the C.N.R. north of Prince Albert, at Niwawa, and at Eldersley, east of Tisdale. At one colony north of Eldersley, as much as two tons of extracted honey have been harvested in a single season.

Altogether there are about nine hundred beekeepers in the province with an output of 72,000 pounds last season.

Hemp Growing

Two farms are interested this spring in increasing the acreage of hemp grown in Manitoba. The Manitoba Cordero Company announces that it has made contracts with a large number of farmers to grow this product, guaranteeing from \$12 to \$15 per ton for hemp straw delivered at their nearest breaking mill.

It isn't always modesty that keeps people from telling the naked truth.

Saskatchewan Butter

Interest In Dairying Increasing With Farmers Throughout the Province

With interest in dairying increasing among farmers all over Saskatchewan, creamery butter production in the province during April totalled over 1,000,000 pounds. This is an increase of 257,487 pounds, or a little better than 45 per cent, over the output of the year ago.

In the first four months of this year, production totalled 3,418,000 pounds, or an increase of 28.9 per cent, over the output during the corresponding period last year.

Four new creameries have been opened in the province this year and five additional plants are now under way.

Seven women now hold flying certificates from the Royal Air Club of Great Britain.

It is always interesting to read the views of publicists in other countries on economical conditions in our own and particularly so when those views are of an optimistic and encouraging character. It is refreshing, therefore, to read in a United States contemporary, a statement of faith in the future of Canada, supported by reference to experiences which the United States itself underwent before it reached its present progressive and happy economical condition.

A member of the Canadian Parliament, writes the Detroit News, states that "Canada is a vassal of the United States," reporting him as saying, "We are paying tribute to the United States to the extent of \$250,000,000 every year; \$200,000,000 of which we pay in imports and \$150,000,000 on money borrowed, on which the News comments editorially, as follows:

"If that constitutes vassalage, then the United States was the vassal of the rest of the world, chiefly Europe, for almost 100 years; for it was not until about 1850 that our exports began regularly to exceed our imports in value, and it was considerably after that date that we ceased to pay Europe huge dividends on borrowed capital.

"If Canada is spending \$200,000,000 a year for American goods, it is a sign that somehow or other she is making the money to pay for them. She is farming, manufacturing, exporting, creating wealth; and part of this wealth she exchanges for American products. Why does she buy these goods? Because she is not self-sufficient. Would she gain by making these goods for herself? Not unless she could make them more cheaply than she can buy them.

"If Canada is spending \$150,000,000 a year for money borrowed from the United States, she is pursuing the same course we followed while we had immense undeveloped resources and small accumulations of capital. We borrowed money where we could get it, and paid high interest on it; but we put that money to very good use. If Canada is doing the same with the capital she has borrowed from the United States, she is following a successful example. She should be thankful, for by putting that money to productive work she will one day secure from the state of 'vassalage' that seems to worry the worthy member of parliament.

"One has but to cast an eye over the map of Canada, a vast territory with extraordinary possibilities, and think of what the people of the United States did to the 'Great American Desert,' to see that any Canadian who is pessimistic about his country is—well, to say the best, he is short of vision."

Sunflowers For Silage

The Effect of Sunflowers on the Following Crop

Sunflowers have gained considerable promise as a silage crop during the past few years, for it is their hardiness which allows them a longer growing season than corn and makes them a more certain crop. They require less moisture than corn and make a good substitute for it in districts in which the summer season is comparatively short, the nights cool and the precipitation scanty. There has been some doubt, however, as to the effect of sunflowers on the succeeding crop, as little was known of their plant food requirements. In order to determine their effect on the following crop an experiment was conducted the day and come out to feed at dusk at the Rothstein, Saskatchewan, night, therefore, the mixture should be experimental station. Corn and grass supplied immediately after sundown to pigs were used for comparison. In the best results, in gardens or in fields containing rows of vegetables, it was scattered thinly along the rows on either side. Flowering when the plants may be protected by placing a small quantity of the poisoned bran around, but not touching each plant.

Cutworms In The Garden

Poisoned Bran Is Recommended As A Means of Control

Cutworms rank among the worst insect pests of garden and field crops. They are general feeders, attacking all kinds of garden plants, particularly when they are young and succulent in the early part of the season. As a rule, they cease to be troublesome after the end of June. A bulletin on cutworms and their control, distributed free by the Publications Branch, Department of Agriculture, Ottawa, gives detailed information on this pest and describes the means of control. Poisoned bran is the best remedy for cutworms, and it should be applied as soon as their presence is indicated. For small gardens one quart of bran, one teaspoonful of Paris green, and one tablespoonful of molasses, with sufficient water to moisten the mixture, is sufficient. When large quantities are needed use 20 pounds of bran, 1 pound Paris green, 1 quart of molasses and 2 to 3 gallons of water. Mix the bran and Paris green thoroughly with dry, dissolve the molasses in the water and pour it on the mixture, stirring well. The cutworms hide in the soil during the day and come out to feed at dusk at the Rothstein, Saskatchewan, night, therefore, the mixture should be experimental station. Corn and grass supplied immediately after sundown to pigs were used for comparison. In the best results, in gardens or in fields containing rows of vegetables, it was scattered thinly along the rows on either side. Flowering when the plants may be protected by placing a small quantity of the poisoned bran around, but not touching each plant.

Manitoba Industries

The largest group of industries in Manitoba, in number of establishments, is in wood and paper products, of which there are 213 establishments, according to figures compiled by the Industrial Development Board of Manitoba, from the government industrial bureau. Next in order come vegetable products, with 150 establishments; chemical products, with 149; and textile products, with 53.

Worried Patient.—Doc, the other physician who looked at me yesterday disagreed with you on the diagnosis.

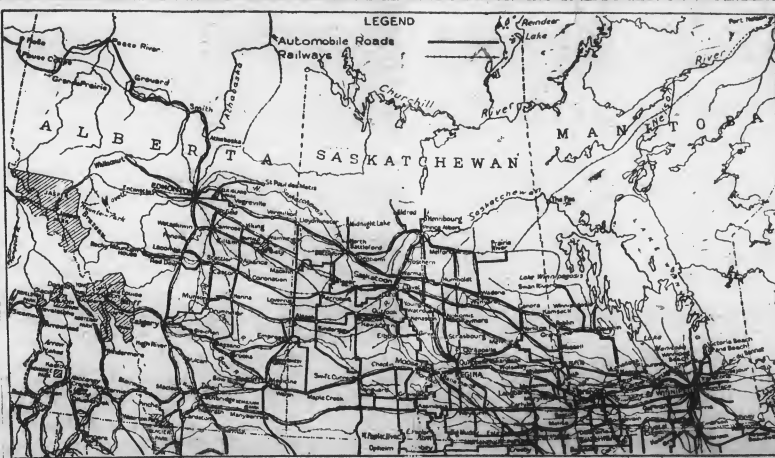

He said—

Doctor.—There, there, never mind. I'm sure the autopsy will prove I was right.

He's A Good Digger

The skunk's naked, but holes are wrinkled crossways, says "Nature Magazine." The hind feet show no clawmarks in the snow, but the forepaws have claws which make a line out of the bed diggers among all the wild folk, surpassed only by the badger and woodchuck.

The test of pallidness is to say "plein" twice that makes the telegram eleven words long.

Map of a portion of the three Prairie Provinces showing the net work of main motor highways and railways which covers this area.

Advantages of Sweet Clover

Savantes Reasons Showing the Advantages of This Crop

(By Jaa. D. McGregor, Gloucester Stock Farms, Brandon, Manitoba)

1. Sweet clover will grow on practically all soils in Western Canada.
2. Is more easily started than alfalfa or any other clover.
3. Makes good pasture and hay.
4. All kinds of stock soon learn to like it.
5. Seeds heavily in all sections, and seed easily saved.
6. Feeding value equal to alfalfa; better for pasture.
7. Starts early in spring, grows all summer and in late fall.
8. Does not bloom close and sheep like alfalfa.
9. A biennial legume—fits well in rotation.
10. Roots are soft, easily inoculated, decay rapidly.
11. As green manure will add more plant food than any other crop.
12. Will smother out nearly all kinds of weeds.
13. Will prepare heavy wet alkali land for other crops.
14. An excellent bee pasture, making white honey.
15. Will grow where other clovers and alfalfa will not: (a) On low, wet, alkali land. (b) On dry, stony, gumbo soils.
16. Alfalfa starts more easily than sweet clover, as the sweet clover roots are softer and more easily inoculated.
17. Sweet clover is no longer an experiment. Grow it, use it. It is one of God's choicest gifts to man.

Insects Wait For Weather

Scientists Say Moth Can Postpone Breeding For Years

Observations made by a British scientist have led to the belief that if the weather is bad the small egg moth can postpone its own birthday for days, months or years. The cocoon of this type is ordinarily due to open in February but if the weather is inclement the birth is usually postponed sometimes for twelve months. Moths have been known to emerge successfully after being imprisoned eleven years.

The bathful lover is always in hot water when trying to break the ice.

Many Prizes For Alberta Corn Show

Will Be Held This Year At Medicine Hat

The provincial corn show for Alberta is to be held this year at Medicine Hat under the auspices of the Alberta Corn Growers' Association. The directors are working out a prize list which will include classes for the following types of corn—yellow and white flint, yellow and white dent, northern dent, sweet corn and popcorn. There will also be classes for shaves. In addition to cash prizes the directors hope to be able to secure several trophies as championship awards.

Vancouver Seeds In England

When many of the gardens in England come into bloom this year, millions of flowers from Canadian seeds will bloom among the plants of the Old Land; for England is turning to the warm climate and rich soil of Vancouver Island for its supply of choicest seeds.

Married men are nearly all great investors—of excuses.

Fine British Types for Canada

The emigration of families from Great Britain to the Dominion is rapidly increasing. The 23 fare and passenger arrangements under the 1,000 Pound Scheme are inducing more to travel. Fifteen of these families sailed recently from Glasgow to Canada on the Canadian Pacific liner Montcalm, and in addition there were quite a number of young fellows who were going to try their luck in the Land of Promise. The above group is a good indication of the class of sturdy emigrant young men that Canada wants and which Canada is certainly getting under the auspices of the British Immigration and Colonization Association.

Strange, Romantic Love Adventures of the Gapper you know

Joanna

by H.L. GATES

Copyright 1925 by H.L. GATES
Published by arrangement with First National Pictures, Inc.

CHAPTER V.—(Continued)

"Say, you," she said, her lips set, "you're just about the same as a new run in an old pair of stockings to me, but you're running the wrong way. We're saying goodbye now, and I'm probably never say hello again, but I'd like you to remember that you were in on the start of something today that's going to have a big finish."

He made no reply, but just looked at her, somewhat sorrowfully. She added, irrelevantly it seemed:

"And it didn't start the way you think and it won't finish the way you expect, take it from me!" Then, her fingers hugged close, she went into the house.

Mrs. Adams was a dear old soul or a mean old termagant, according to whether you owed your room rent or not. Not that she was so much different, under the latter circumstances, but the general aspects of her seemed different. As a matter of fact, she was good for four weeks of arrears for any girl and after that, why, as many more as a girl required if she was in real hard luck and actually trying to get out of it. Joanna, herself, had once comforted a girl friend, who had mortgaged her room rent for two weeks ahead on a dress she couldn't afford with: "Never mind, dearie! The first week's the hardest. After that it's easy for you, and I guess that won't do you any harm, either."

Mrs. Adams was breathless with curiosity when Joanna faded in the dish room which gained its proper designation from the iron clad rule which the landlady laid down meticulously to each new lodger: "My young ladies receives their company of the other sex in the drawing room only!" Her young ladies customarily referred to the big front room downstairs with the two upstair legged gold chairs and the three overstuffed things in faded red, as "the drawing room only." Joanna, speechless for a moment, shoved her flowers into the landlady's arms. At the same time she noticed that the old lady had taken off her apron. She'd never seen Mrs. Adams, except on Sundays, with her apron off. It gave her something easy to talk about as a starter:

"I didn't know it was you getting

RESTORED TO GOOD HEALTH

Mother of Eleven Children
Praises Lydia E. Pinkham's
Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, my youngest baby is five months old. I am only 35 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I know of it from my sister, Dame Edouard Bellefeuille of Kansasville. For five years

was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to young girls."—DAME WILLIAM PARSONS, Box 414, Buckingham, Quebec.

Why suffer for years with headache, nervousness and other ailments common to women from early life to middle age when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 88 out of every 100 reported they were benefited by its use.

W. N. U. 1630

to the million dollars the landlady patted her hair and tucked in a grey wrap that hung down behind; but when the girl came to the door, she was silent, motionless, and she kept her hands folded in her lap.

Joanna went over and kissed her on the top of her head, lightly. She didn't respond to that, which Joanna understood. It was a lot of news that had been thrown at her.

"Now I'm going upstairs and try to cry," said Joanna, gathering her new coat on her arms and giving the bundle that held her old one a kick into a corner where she could salvage it later. "And if I can't cry I'm going to laugh. If I can't do that either I'll try standing on my head and see if I can figure things out that way."

She didn't notice a sad little shake of the head which the landlady sent her way.

She turned to the door, but stopped, and opened her bag. She selected the crispest of the five hundred dollar notes, went over to the grey-haired Mrs. Adams, showed her the size of it, and then crumpled it in the old lady's toll worn fingers. Mrs. Adams, with wet, troubled eyes, looked into the girl's face, and would have said something, but Joanna stopped her by putting a hand over her mouth.

"Just keep the lid on the 'don't want to take it' stuff," she said. "I know you couldn't think of accepting it, and it isn't coming to you, and I only owe you for two weeks—but I've got to give something to somebody, haven't I?"

She was going out the door when she stopped again, and turned around. Mrs. Adams still was looking at her dully. She struck a pose that she concluded, was particularly appropriate for the framing of a doorway—body leaning against one side of the door frame, hand stretched across to the other, and her chin turned around a shoulder into the room:

"There's one thing you can do, Mrs. Landlady-mine," she said. "You can hold in the pews till I get ready to spread it, and then you can open the flappers out of the drawing room only for tonight, because my John's coming around on his regular date and when he gets here I'll need the whole darn room for a lot of heavy stuff."

(To be continued)

A MEDICINE THAT GIVES STRENGTH

New Health Comes to Those Who Build Up Their Blood by the Use of Dr. Williams' Pink Pills.

Dr. Williams' Pink Pills are a strengthening medicine. Surely and effectively they build up the blood, invigorate the appetite, tone up the digestion, give brightness to the eye, color to the cheeks and lips, and quickness to the step. These pills have direct action on the blood, making it a health-bringing stream that carries the body can escape their beneficial action. Weak men and women, boys and girls find new health and strength through the use of this world-renowned blood builder. Mr. N. H. Langille, C.N.R. agent at New Germany, N.S., says:—"In November, 1924, I had a severe illness which left me in a very run-down condition. I got a supply of Dr. Williams' Pink Pills and derived great benefit from them. My appetite improved and a gain in weight which is now normal I owe to the use of the pills. I can therefore recommend Dr. Williams' Pink Pills as a fine tonic."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuritis, nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. Get a box from the nearest dealer or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Among the good that die young in this hard-boiled age is good manners.

It is estimated that over 3,000,000 bicycles are used in Japan.

Will Exhibit White Elephant

Sacred Beast From Burma To Tour America

America is to see a real white elephant. The sacred white elephant from Burma, which made its premier debut at the London Zoo, May 1, will remain there for four months and then go to the United States.

This elephant is a pinkish white all over and is regarded as a sacred beast in Burma. A special hungalow was erected for the animal, which cannot be sheltered by other elephants, because of its sacred character.

Cheapest of All Oils.—Considering the qualities of Dr. Thomas' Electric Oil in every respect, all preparations offered to the public. It is to be found in every drug store in Canada from point to point and all country merchants kept for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

And This Is England

Journalist Tells Sad Story of American in London

Here is a sad story told by an English Journalist in one of the London papers: "As I walked along the Strand as America's clock informed that it was then 6:15 p.m. in New York City. Yellow American flags, burning American motor spirit, hurried past taking people home from seeing American plays and American films, past American candy and five-and-ten-cent stores, American soda fountains and shops full of American cameras, typewriters and tooth paste. Then—this is every word true, he hasn't changed past, a ghost from the '30's, and England was herself again."—New York Times.

Objects To Parole System

Prisoner's Temporary Good Behavior Does Not Warrant Freedom

Any had man is likely to be good while he is locked up in prison. That he behaves while locked up is no reason why he should be pardoned or paroled. It needs something more than temporary good behavior to warrant the freedom of a man who has been confined by order of a judge and jury. There is some explaining to be done.—Los Angeles Times.

Miller's Worm Powders not only make the inflexible system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other intestinal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Long Journey Made By Bottles

Many Committed to Waves Drift Thousands of Miles Before Coming to Shore

A bottle (thrown into the sea by the United States fishery bureau off Chatham, Mass., was recently picked up at Bristol, England, having accomplished its voyage across the Atlantic in just two years, says the Manchester Guardian. Similar experiments over a considerable number of years by Capt. Simpson, F.R.S., yielded some interesting results.

Of several thousand bottles which he committed to the waves about 19 per cent. were picked up in various parts of the world, and the particular bottle asked for in the letter enclosed in each bottle were supplied by the finders. Many of these bottles drifted 10,000 miles before coming ashore, the average rate of travel working out at about half a mile an hour. One of Captain Simpson's bottles took four and one-half years on its sea trip, in which time it travelled from Cape Town to the Shetland Islands.

Minard's Liniment for backache

May Restore Ancient Legend

Has Effect On Plants

The old belief, always scoffed at by scientists, which led some farmers, religiously, to plant their crops in certain phases of the moon, may yet receive some support. Some time ago scientists began to discover that certain living creatures, notably some kinds of seaweeds and some species of ocean dwelling worms, possessed a distinct lunar periodicity. They drifted or came to the surface, or burrowed or did other quite definite things in exact correspondence with the phases of the moon. It seemed almost as though they had an almanac. Now there has come to light another fact that seems likely to explain this one.

It has been found that the kind of light called polarized light is more effective in certain of the chemical processes of life than in ordinary light. Moonlight is partly polarized. It is composed in part of this same kind of light which scientists now find peculiar in its actions on living matter. Possibly moonlight really does have a different effect on plants and animals than does sunlight decreased to the same intensity. This would explain the apparent moon knowledge of the sea worms and the sea weeds. It would restore another ancient legend of mankind to an honored place among the truths of observation.

Has Unique Privilege

One Englishman Can Keep Hat On In King's Presence

To Michael Constantine de Courcy, Baron Kingsale, belongs the unique privilege of being the only man in the United Kingdom who may, if he so elects, keep on his hat in the presence of the King of England. A hereditary prerogative granted to Sir John de Courcy in the reign of King John for conquering Ulster, is the reason the peer enjoys this curious privilege. Historical records show the permission to have been exercised only five times, the last instance being in 1859, when John de Courcy, successor to Gerald, Lord Kingsale, stood with his head covered in the presence of Queen Victoria.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that it is understood by the instructions. Used as a liniment, the oil directs is to rub, and when rubbed in it is to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Little Helps For This Week

Verily I say unto you, whosoever shall not receive the kingdom of God, and thus shall not enter therein.—Mark x, 15.

Do like a child, and learn and rest Upon Thy Father's arm; Pour out thy troubles on His breast, And thou shalt know no harm. Then shall thou by His hand be brought.

By ways which now thou knowest not, Up through a well-fought fight, To heavenly peace and light.

—Paul Gerhardt.

O Father, who are in all perfect before the longing of Thy children—and we are all and altogether Thine.—The will make us pure and loving and true. We'll stand fearless in Thy presence, because perfect in Thy love. Oh! let the heart of a child be given to us, that we may arise from the grave of our dead selves, and die no more, but see face to face the God of the Living.—George MacDonald.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how necessary has been his suffering. This remedy remedy gives sure relief to all afflicted with asthma. Inhalant smoke or vapor it brings the help so long needed. Every doctor has it or can get it for you from his wholesaler.

Find Roman Ruins

In Sussex Village

Archaeologist Assisted in Excavations By College Students

Students from Oxford and Cambridge passed their spring vacation in Sussex, S. E. England, the archaeologist, in his excavations near Pulborough in Sussex. It has now been definitely established that the site of the excavations was some 2,000 years ago a road connecting the early Roman road of State Street with the main road to London. Masses of archaic pottery have been brought to light, probably belonging to the first century A.D., and iron finger rings and numerous other things have also been discovered. A pre-Roman bridge, queen and a number of thin instruments have also been discovered.

The authorities of University College, London, have decided to establish a new Danish lectureship in memory of a Queen Alexandra.
